Monitoring the performance of Projects and Programs

Total number of projects **19**

| 1 | 15 | 1 | 2 |
| In preparation | In progress | Pending | Completed |

Automated Project and Program Performance Monitoring Tool

Many countries receive development assistance in various forms (loans, grants, aids, etc.) to finance development projects and programmes. Without an effective monitoring system for projects, the large sums planned have a low disbursement rate reflecting the lack of performance of projects and programmes.

DISBURSED

25%

This negatively impacts the implementation of Development Programmes despite the availability of Resources.

In many cases, findings are only made at the time of portfolio reviews without a tool of anticipation

It is therefore essential to have a Tool to monitor the Performance of Projects individually and across the Portfolio in order to quickly detect Problems and take appropriate measures in time to avoid the low Disbursement Rate and resulting poor portfolio performance.

This problem is addressed by OSAPP Automated Project and Program Performance Monitoring Tool.

OSAPP is a digital platform that links the **Focal Points** of the project implementation structures (ministries, project management units, etc.), the **Project Portfolio Coordination and Monitoring Body** and the Development Partners (**Donors**)
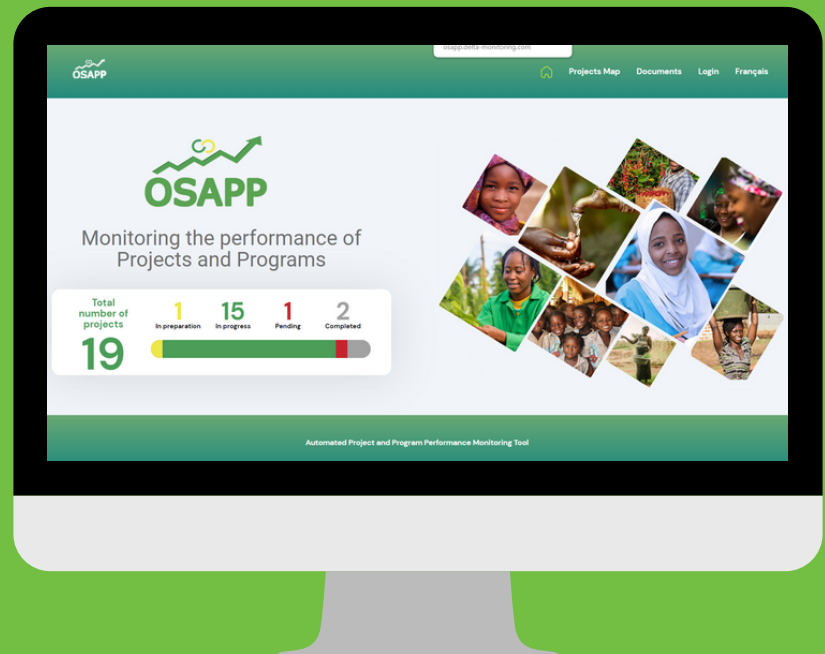

Web & Mobile Platform

OSAPP

WITH OSAPP, ALL STAKEHOLDERS COOPERATE THROUGH THE PLATFORM WITH ACCESS LEVELS GUARANTEEING CONFIDENTIALITY OF INFORMATION

Ministries of Finance, Project Portfolio Coordinators

Project Execution Structures, PMUs, etc.

Funders

- **The Performance Indicators (Disbursement Rate, Physical Progress Rate, etc.) are filled in by the Project Execution Structures,**
- **The Coordination Body at the level of the Ministry in charge of the Economy monitors in real time the individual performance of the projects and that of the Global Portfolio,**
- **Development Partners (Donors) monitor the performance of their respective projects and portfolios in real time.**

Beyond Performance Monitoring, OSAPP helps to:
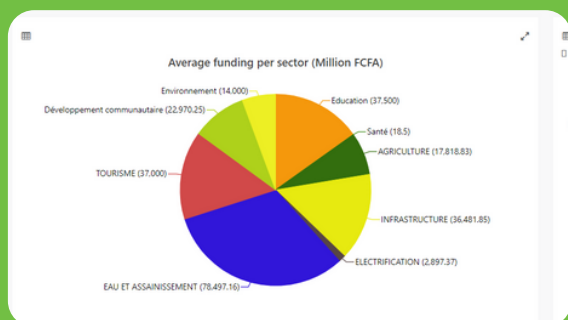

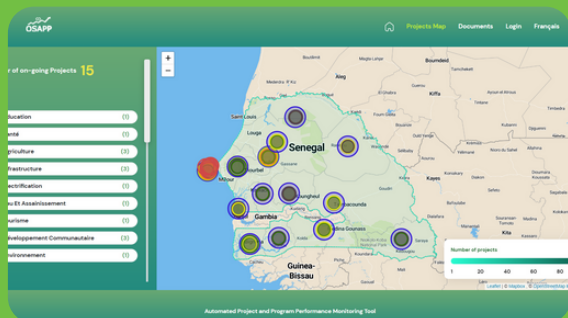

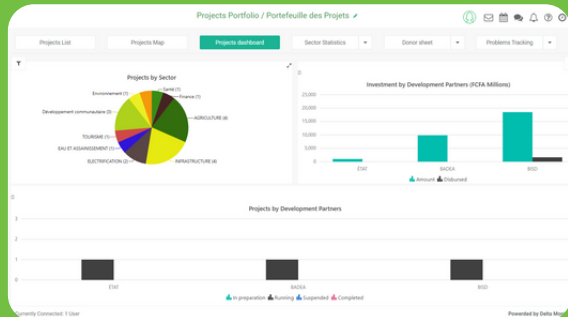

- **Check and Validate the Information before making it accessible,**

- **Analyze project performance by Development Partner, Sector, Ministry, Executing Agency, Region, etc.**

- **Generate relevant Sector Statistics Reports,**

- **View the Geographical Breakdown of Investments,**

- **Track Non Objection Notification requests,**

- **Monitor problems and difficulties encountered in the execution of projects in order to take corrective action on time,**

- **Monitor Portfolio Sector Reviews, identified issues and risks as well as implementation of recommendations**

- **Manage and share all project documentation online and in strict respect of confidentiality,**

- **Communicate and Exchange with project managers directly on the platform. Consult all history of exchanges.**

A Tool that impacts Project Performance from the first months of use!

With OSAPP

- Don't be surprised by the poor performance of projects or the portfolio (automatic alerts can be sent by email and sms),

- Monitor the performance of projects in real time, anywhere and at any time on your computer, tablet or smartphone.

- All Stakeholders (Ministries, Coordinators, Portfolio Managers, Focal Points, etc.) have access to project information according to their profile in a security and confidentiality.
